

METHOD AND SYSTEM FOR SELECTING ITEMS
TO REPLACE INSURED ITEMS

ABSTRACT OF THE DISCLOSURE

5 A web-based method for identifying items to replace insured items includes receiving item specification information from at least one of a user, a manufacturer, a distributor, a system administrator, and an authorizing agent, and utilizing a server to compare the received specification information with pre-stored information. The method also includes selecting at least one item which matches the received specification information and downloading information to the user related to the item.
